

GRASS THAT LASTS

Hear from the farmers doing it and the agronomists helping them to establish perennial pastures in our variable climate.

If you have sprayed a paddock and are getting ready to sow, get in the know, hear practical, paddock-based discussions on the best way forward, what works and what does not.

PERENNIAL PASTURES FIELD DAY

- Are perennial pastures worth the big upfront costs?
- What do the persistence and financial returns look like over five years?
- How have some farmers doubled their stocking rates?
- How do you establish perennial pastures in a variable climate?
- Anyone can grow grass when it rains, learn how to manage your farm feedbase when it doesn't.
